

### FROM THE DIRECTOR

On 1 April 2015, I took over as director of the Fridtjof Nansen Institute (FNI), as former director Leiv Lunde had stepped down in late 2014 to become Strategy Director at the Norwegian Ministry of Foreign Affairs. I am very proud to be leading such an internationally renowned research institute as FNI. With our

focus on international relations and international law related to environmental protection, management of natural resources and energy, the work of our institute is of greater current relevance than ever.

Our main asset is our excellent staff. In 2013, FNI achieved the highest score ever for scholarly publishing among all Norwegian research institutes, regardless of academic profile. The statistics for 2014 are not yet available, but in absolute numbers of publications we achieved the same level as the year before. Moreover. our success rate for proposals submitted to the Research Council of Norway in 2014 was well above 50 per cent

- as against the average 10

to 15 per cent for all projects proposed to the Research Council. Especially noteworthy was our grand slam at the first allocation of funds under the Research Council's new programme for climate research, KLIMAFORSK, where we were granted funding for three projects to a

total value of approx. NOK 25 mill. These projects deal with the international system for emission trading, challenges to the law of the sea as the result of sea-level rise, and climate mitigation in China and in Russia. A further major achievement was the signing, in late 2014, of a framework agreement with the

Ministry of Foreign Affairs on the further development of Norway's High North policies.

We are fortunate to have our workplace in the beautiful natural surroundings of Polhøgda - Fridtjof Nansen's estate near Oslo. With this comes the responsibility for maintaining the property, and in 2014 several new projects were initiated to protect the historical main building from the hazards of fire, humidity and vermin. We also began implementing our plan for improved conservation of Nansen's study room in the tower at Polhøgda.

Together with me in the new FNI leadership group I am pleased to have Lars H. Gulbrandsen as Deputy Director and G. Kristin

Rosendal as Research Director, with Claes Lykke Ragner continuing as Head of Administration. I am confident that we can look forward to many rewarding years in the times to come.

Geir Hønneland

# ANNUAL REPORT OF THE BOARD, 2014

### **ACADEMIC PROFILE AND MAIN OBJECTIVES**

The objective of the FNI is to understand the underlying forces in international environmental and resource politics, and on that basis make well-founded contributions to political solutions of problems in these areas. The institute also works to promote greater awareness of how Norway is influenced by, and may exert influence on, international framework conditions in these areas.

The institute undertakes academic studies, applied research projects, investigations and evaluations. FNI research is expected to maintain a high level of scholarship and contribute to further scientific development through international publication and other means. The institute also strives to be user-friendly and deliver results of practical relevance. The balance between these concerns is complex and is not necessarily reflected in each single project or publication. For the institute as a whole, however, both elements are important.

### **FOCAL AREAS AND RESEARCH PORTFOLIO**

In 2014, FNI research activities were grouped in the following seven focal areas:

- Global environmental governance and law
- · Climate change
- · Law of the Sea and marine affairs
- Biodiversity and genetic resources
- Arctic and Russian politics
- European energy and environmental politics
- Chinese energy and environmental politics

The project portfolio consisted of 45 research and evaluation projects. Project acquisition was good, with 15 new externally-financed projects secured, including large-scale, multiyear projects and shorter evaluations. Particularly notable was the award round of the Research Council of Norway's KLIMAFORSK Programme in March, under which FNI was granted financing for three new major, multiyear projects, a boost for FNI's research on climate-change politics and law.

### FINANCING AND ECONOMY

The various programmes of the Research Council of Norway (RCN) provided our main source of revenue in 2014. The institute acquired several new projects, in competition with other research centres. These projects were awarded from various programmes, which in turn receive their funding from a range of government ministries and other sources.

The institute also receives an annual basic grant from the RCN. This funding is to be used to 'ensure a long-term basis for professional research quality and results within the institute's key activities'. The grant of NOK 8,236 million in 2014 was used for supplementary financing of PhD projects, preparation of manuscripts for peer-reviewed publication, project initiation and strategic expertise-building projects.

Government ministries, businesses, private foundations and institutions abroad were also among the FNI's sources of funding.

In 2014 a final decision was made in the legal case which FNI and several other research institutes have had running with the Norwegian authorities regarding tax exemption. The decision was as expected, and entails tax exemption for much over half of the institute's income.

Liquidity remained satisfactory throughout the year 2014

The institute's economic situation is deemed satisfactory. The FNI Board and leadership consider the plans for continued activities to be justified by the annual accounts for 2014.

#### **PERSONNEL**

24 researcher work-years were carried out at the FNI in 2014. As of 31 December 2014 the institute had a research staff of 28, four in part-time positions. The administrative staff of seven persons carried out just under 5½ work-years altogether.

The FNI has continued its active recruitment of Master's degree students. In the course of 2014, 15 students were associated with the institute for longer or shorter periods. In all, 55 people were associated with

the institute during the year, on a full-time or parttime basis or on student scholarships.

As of the end of 2014, the FNI had nine staff members qualified as Researcher I (Professor), while 13 qualified as Researcher II (Associate Professor) in the Norwegian system. Of these 22, a full 16 hold doctoral degrees. A doctorate automatically results in promotion to Researcher II; the other six have had their qualifications recognized by external evaluation committees.

The FNI has maintained its focus on doctoral-level research. Four of six researchers engaged by the FNI in 2014 had already obtained their PhD degrees, while the other two were in the process. In addition to ensuring important individual qualification, doctoral projects are a major element in our long-term strategy for building expertise.

Two FNI researchers have additional part-time university employment, at the Universities of Oslo and Tromsø. Furthermore, two professors from the University of Oslo have part-time employment with the FNI. In the course of 2014, three guest researchers visited FNI, from institutions in China, Germany and Norway.

#### **PUBLICATIONS**

2014 was another excellent year with regard to scholarly publication. In all, 27 scientific articles were published in peer-reviewed journals, as well as 21 articles in scientific books and three scientific monographs. This consolidates FNI's position as one of the leading Norwegian social science research institutes in terms of scholarly publishing.

#### RESEARCH COOPERATION

A central element in developing the professional activities of the FNI has been expansion of collaboration with other research institutions and individual researchers, in Norway and elsewhere, to supplement the institute's own expertise.

In 2014 the FNI had formalized cooperation with a range of Norwegian institutions. These include the Norwegian Institute of International Affairs (NUPI); the Universities of Oslo, Bergen and Tromsø; CICERO – Centre for International Climate and Environmental Research; the Centre for Development and the Environment (SUM); the Peace Research Institute Oslo (PRIO); the Norwegian Institute for Defence Studies (IFS); NOFIMA; Genøk; DNV-GL; the Norwegian Institute for Nature Research (NINA), the Oslo and Akershus

University College, Northern Research Institute (NOR-UT); the Sigra Group; the Norwegian Forest and Landscape Institute; the Norwegian University of Life Sciences (NMBU); the Norwegian Work Research Institute (AFI) and the Norwegian Institute of Public Health.

In 2014 the FNI was also involved in various multinational research projects. Partners included Gesellschaft für Internationale Zusammenarbeit (GIZ, Germany), the University of Lund (Sweden), South Asia Watch on Trade, Economics and Environment (SAWTEE, Nepal), the University of Umeå (Sweden), Carleton University (Canada), the University of Wageningen (the Netherlands), Shanghai Institutes for International Studies. Korea Maritime Institute, the Polar Research Institute of China, the Institute for Defence Studies and Analyses (India), WWF Russia, Imperial College London, the University of Otago (New Zealand), the University of Plymouth (UK), the University of Leicester (UK), George Washington University (USA), the University of New South Wales (Australia), the University of California, Tsinghua University (China) and the Autonomous University of Madrid Foundation (Spain). In addition, the FNI works together with foreign researchers on an individual basis.

### **INSTITUTE LEADERSHIP TEAM**

Leiv Lunde stepped down as FNI Director on 20 October, and the Board established a committee to find his successor, a work that was not yet completed by the end of the year. In the interim period, the Board installed Arild Moe as Acting Director. Meanwhile, Research Director Geir Hønneland became Deputy Director from 1 November, and Research Professor Kristin Rosendal became Research Director from the same date. Claes Lykke Ragner served as Head of Administration and Information throughout the year.

# EQUAL OPPORTUNITY, WORKING ENVIRONMENT, SICK I FAVE

Of the 55 persons affiliated with the institute in 2014, 31 were men and 24 were women. Six of seven persons newly employed during the year were women. The FNI does not have specific policies for employing women, but, viewed over a period of several years, our recruitment has been gender-balanced.

Sick leave in 2014 stood at 1.3%.

In the assessment of the Board, the FNI enjoys a good social and physical working environment.

FNI activities have little direct impact on the external environment. We strive to reduce paper consumption through the use of electronic media; paper and plastics are sorted and delivered for recycling.

### MANAGEMENT OF THE POLHØGDA PROPERTY

In addition to day-to-day maintenance, the focus of FNI property management in 2014 has been on protecting the historical main building against the hazards of fire, humidity and vermin, through upgrading of the electrical system and rehabilitation of the foundation wall and ventilation hatches.

Furthermore, FNI in 2014 began implementing its plan to raise the conservation level in Fridtjof Nansen's study room, with funds provided from the Bergesen Foundation, working in close cooperation with experts from the Norwegian Museum of Cultural History.

### WORK OF THE BOARD AND THE COUNCIL

One Council meeting was held in 2014, and there were three meetings of the Board.

### THE AUDITOR'S REPORT

To the board of Fridtjof Nansens Institutt

#### INDEPENDENT AUDITOR'S REPORT

#### Report on the Financial Statements

We have audited the financial statements of the Foundation Fridtjof Nansen Institute showing a profit of NOK 316 542. The financial statements comprise the balance sheet as at 31 December 2014, Income statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

The Board of Directors and the Management's Responsibility for the Financial Statements

The Board of Directors and the Managing Director are responsible for the preparation and fair presentation of these financial statements in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for such internal control as the Board of Directors and the Managing Director determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control reparant to the foundation's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control, audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the voverall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Oninion

In our opinion, the financial statements are prepared in accordance with the law and present fairly, in all material respects, the financial position of Fridtjof Nansens Institut at December 31, 2014, and its financial performance for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway.

#### Report on Other Legal and Regulatory Requirements

Opinion on the Board of Directors' report

Based on our audit of the financial statements as described above, it is our opinion that the information presented in the Board of Directors report concerning the financial statements and the going concern assumption is consistent with the financial statements and complies with the law and regulations.

#### Opinion on Registration and Documentation

Based on our audit of the financial statements as described above, and control procedures we have considered necessary in accordance with the International Standard on Assurance Engagements (ISAE) 3000, «Assurance Engagements other than Audits or Reviews of Historical Financial Information», it is our opinion that the management has fulfilled its duty to produce a proper and clearly set out registration and documentation of the foundation accounting information in accordance with the law and bookkeeping standards and practices generally accepted in Norway.

#### Opinion on management

Based on our audit of the financial statements as described above, and control procedures we have found necessary in accordance with international Standard on Assurance Engagements (ISAE) 3000, we believe the foundation is managed in accordance with the law, the Foundation purposes and bylaws otherwise

<sup>\*</sup> According to the The Norwegian Association of Higher Education Institutions (UHR) definition of 'scientific publication', including requirements that the publication presents new insight, has a form which enables verification of results (incl. references), and is published in approved scientific publication channels (journals/book publishers) with peer review. Publication points are calculated according to rules set by the Research Council of Norway.

<sup>\*\*</sup> Books, articles, book chapters and reports that, for various reasons, do not fulfil the UHR definition of "scientific publication", but which are directed towards an academic audience (as opposed to commentary articles and other popularized publications which are mainly directed towards users and the public).

<sup>\*\*\*</sup> Also includes edited books, new editions, translated versions and other books (or book-like publications) where FNI researchers have been heavily involved.

<sup>\*\*\*\*</sup> News agency articles etc. published in several different newspapers/media are here counted only as one.

<sup>\*\*\*\*\*</sup> Larger seminars and conferences organized by FNI (alone or in cooperation with others).

### THE NANSEN HERITAGE

Fridtiof Nansen (1861-1930) became famous for his exploration of the Arctic, but he also made major scientific contributions and worked as a diplomat. In his later vears he worked extensively to help prisoners of war and refugees, and with famine relief. These activities were carried out under the auspices of the League of Nations as well as on Nansen's own initiative. For these humanitarian efforts he was awarded the Nobel Peace Prize in 1922. Nansen was aware of the shortcomings of existing international structures and was deeply engaged in establishing international cooperation.

Fridtjof Nansen lived at Polhøgda from 1901 until his death in 1930. His grave is in the garden in front of the house.

The Fridtjof Nansen Foundation at Polhøgda was established to conduct research within the interest areas of Fridtjof Nansen and to maintain the property of Polhøgda. The Foundation conducts its research activities under the name of the Fridtjof Nansen Institute (FNI).

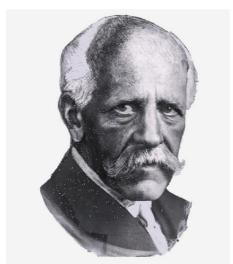

Photo: Jan Dalsgaard Sørensen

FNI's Statutes state that:

The Fridtjof Nansen Institute (FNI) shall engage in basic and applied research and commissioned studies, as well as in dissemination of information, consultancy and publishing related to the above. FNI research is to be conducted according to basic rules and principles for modern science. Research activities are conducted in accordance with plans approved by the Board.

It is the Foundation's obligation to keep Polhøgda, including the building as well as the grounds and Nansen's grave, in such a condition as to make it a worthy memorial to Fridtiof Nansen's name, his life and deeds, and a befitting framework for those of his belongings that are of public interest. Nansen's study in the tower is, to the extent possible, to be left as it was when he lived. The property shall not be a museum. It is to be used for the good of mankind. as a place of work, preferably in connection with interests close to Fridtiof Nansen, such as oceanography, polar studies and research of importance to international cooperation.

# **ABOUT THE FRIDTJOF NANSEN INSTITUTE**

The Fridtjof Nansen Institute (FNI) is an independent institution engaged in research on international environmental, energy, and resource management politics. Within this framework the institute's research is mainly grouped around seven focal points:

- Global environmental governance and law
- Climate change
- Law of the Sea and marine affairs
- Biodiversity and genetic resources
- Arctic and Russian politics
- European energy and environment
- Chinese energy and environment

The main disciplines are political science and law, but FNI researchers also hold degrees in economics, history, geography, social anthropology and development studies, and have special language and regional competence on Russia and China.

FNI currently has a staff of around 40, including more than 25 full-time

researchers and 3-8 Master's students.

FNI's activities include academic studies, contract research, investigations and evaluations.

FNI's sources of funding include the Research Council of Norway, various Norwegian public bodies, business associations and private companies, the European Commission and international research foundations. Annual turnover is around 35 million NOK.

FNI collaborates extensively with other research institutions and individual researchers, in Norway and abroad. It strives to make its expertise available and relevant to users as well as to the public at large. FNI research is published in international scholarly journals and books. The institute also has its own report series. In addition, it publishes a bi-annual newsletter.
